

ADVANCED SUSPENSION TECHNOLOGY

MOTORCYCLE

ROAD & TRACK

HISTORY

Ever since the company was founded in 1976, Öhlins has represented the very pinnacle of suspension technology and firmly rooted itself as an intricate part of the motorsport industry, underpinning countless world titles. That very technology has subsequently been adopted not only as the gold standard of aftermarket suspension, but is also by car and motorcycle manufacturers around the world.

Back in the 1960's, Kenth Öhlin was an up-and-coming motocross rider and showed an innate talent for mechanics. He knew how to bring the best out of his material and soon he saw himself engaged in modifying his competitor's bikes. By the time he started his business he had already designed exhaust pipes, engines and – of course – shock absorbers.

Öhlins soon became synonymous with advanced suspension. The products were not only superior in terms of technology, but as Mr. Öhlin was, and is, a very meticulous man the quality was always outstanding. The first world championship was won already in 1978, as Russian Gennady Moiseev took the 250cc title on an Öhlins equipped KTM. Since then, more than another 350 world titles have followed. The success continued in road racing and soon also in the automotive segment, in racing as well as in rally, all adding to the motorsport pedigree. But don't think that Öhlins was content, not for a minute. The company continued to grow, adding electronically controlled, semi-active suspension to its portfolio under the trademark CES. Today, this technology has revolutionized the car industry and can be found in a wide range of products from premium car manufacturers.

In the 1980's, Öhlins' achievements got the attention of industrial giants and in 1987, Öhlins was acquired by Yamaha. Under the Japanese ownership, Öhlins had the necessary financial stability to develop into a dominating player in the industry. Twenty years later, Öhlins was considered better off on its own legs and Kenth Öhlin regained the company he once had started.

ÖHLINS HALL OF FAME

Öhlins Racing won its first World Championship Title in 1978 with Gennady Moiseev in the 250cc Motocross championship. From that day, Öhlins has won world championships titles every year, first in Motocross, later in Superbike classes and Auto motorsport championships such as WRC with Mitsubishi, Endurance, VLN, GT-Racing, Touring cars and Formula racing series. In 2020 Öhlins won MotoGP Championship again as well as many other national and international motorcycle road racing championships.

ÖHLINS TESTING & DEVELOPMENT

At Öhlins, we are serious about suspension. In fact, we live it and breathe it. The amount of engineering that goes into our products is simply staggering, every single product is tested and measured prior to production, in order to make sure you get the best performance possible. Think computer simulations, rig tests and evaluation on either race track or on the street. Or both. It may be the latest development for MotoGP or a new street application for your daily ride, our strict program applies to everything we do.

Öhlins are proud of the amount of engineering that are put in to our products. Remember, a large portion of our revenue is reinvested directly into research and development.

Not only that. In order for you to be sure to enjoy perfect performance from your Öhlins product for many years to come, every component is subject to a number of tests, from corrosion to fatigue resistance. And of course, our products are fully rebuildable should the day come.

FIND YOUR ÖHLINS PRODUCT WITH PRODUCT SEARCH

Explore all our products for your bike with a few clicks. On our "Find your product" page at ohlins.com we've made it easy for you to type in your bikes make, model, and year to get a list of all the products we offer for your motorcycle.

SHOCK ABSORBERS

Öhlins shock absorbers come in a wide range of designs and functionality, with and without adjusters. We manufacture more than 300 different shock absorber models to more than 1000 applications. Our technology starts its life in high-end racing such as MotoGP or WSBK. From the racing world comes our aftermarket shock absorbers that use the components and functionality from our racing knowledge. Öhlins shocks will improve your grip, stability and give a huge boost to the bikes chassis performance.

ÖHLINS SHOCK ABSORBER TYPE CODE EXPLANATION

The type code exists so that it is possible to visualise the damper by reading the type code. Type code consists of first a letter followed by two digits that is followed of at least one letter. e.g. S36E.

T36PR1C1LB

SHOCK ABSORBER TYPE

S, T

Single or twin tube design.

**30, 36, 39, 40, 44, 46
and 50mm**

Piston diameter

E

Emulsion type of shock absorber.

D

Monotube high pressure gas type of shock absorber with internal reservoir in the main body.

P

Monotube high pressure gas type of shock absorber with external "piggy back" reservoir.

H

Monotube high pressure gas type of shock absorber with hose mounted external reservoir.

Q1

Progressive damping shock absorber with two pistons.

W

Shock absorber delivered without spring.

ADJUSTMENT FEATURES

C1

Adjustable compression damping. Adjuster wheel or slot on the reservoir.

C2

Adjustable high- and low- speed compression damping. Hexagon or slot on the reservoir.

C4

Electronically Controlled (EC) compression damping adjuster.

R1

Adjustable rebound damping. Adjuster wheel or slot above the end eye.

R1

Adjustable rebound damping. Adjuster wheel or slot on the reservoir.

R4

Electronically Controlled (EC) rebound damping adjuster.

S

Hose mounted hydraulic spring preload adjuster.

S1

Electronically Controlled (EC) hydraulic spring preload adjuster.

B

Integrated hydraulic spring preload adjuster. Adjuster wheel or hexagon on the adjuster.

L

Adjustable length.

Mechanical spring preload adjuster.

SUPERSPORT

The background of the slide is a blurred photograph of a sports field, likely a baseball or softball field, during the "golden hour" of sunset or sunrise. The sun is low on the horizon, creating a warm, orange glow. In the foreground, the green grass of the infield is visible, transitioning into the brown dirt of the base paths. The outfield fence and some stadium lights are visible in the distance, all blurred to create a sense of motion and atmosphere. A solid yellow horizontal bar is positioned directly beneath the "SUPERSPORT" title.

SUPERSPORT

TTX GP

SHOCK ABSORBER

TTX

Öhlins are continuously striving to improve their products on quality, consistency, and performance. From our latest research and development, we have made many components and setting improvements that we have combined into this shock. The TTX GP features a new type of valve which gives better feedback to the rider, also a new piston and band which together with the new valves enhances grip, stability, feedback, and consistency. The new adjuster knobs make it easier to make changes on the fly with or without tools compared to the old design.

TOP FEATURES

- > TTX-technology
- > Rebound and compression adjustment straight from MotoGP
- > Adjustment needles with different flow restriction behavior to improve chassis feedback
- > Wider and more precise adjustment range
- > Adjustment possible by hand or with hexagon tool

OHLINS.COM

SUPERSPORT

TTX RT

SHOCK ABSORBER

TTX

The TTX Road & Track is developed for the latest supersport models as a complement to the top of the line TTX GP shock. The TTX RT has a competitive price but still offers great performance for the road and track day enthusiast. The shock is based on the TTX 36 with its race proven technology. It has a traditional C-spanner type pre load adjustment, easily accessible rebound and compression adjustment on the cylinder head. The result is a shock absorber with the long term technology developments from Öhlins experience in MotoGP and WSBK.

TOP FEATURES

- > TTX-technology
- > Wide adjuster range
- > Completely separated functions for rebound and compression damping
- > All adjustments are done on the cylinder head of the shock absorber
- > Length adjustable for most models

SUPERSPORT

STX 46

SHOCK ABSORBER

STX

The Öhlins STX 46 shock absorber is available for many different bikes in the small to mid-size supersport segment, such as Kawasaki Ninja 400 and Aprilia RS 660. This shock absorber features the well-known Öhlins monotube design and build quality. With fully adjustable compression and rebound damping it has a great range of adjustment. Also you can fit the shock absorber with an optional hydraulic spring preloader! With enhanced cornering performance and improved comfort it will inspire you to go faster around the track but also works great on your daily commute and weekend rides.

STX 36

SHOCK ABSORBER

STX

The ride to the track should be just as enjoyable as the race itself. You need to feel confident, comfortable, and ready to take on your best race yet. With Öhlins STX 36 Supersport shock absorbers you will experience the track day feeling no matter if you're on or off the track.

Our STX 36 Supersport is available in the classic inline, piggyback, and hose remote reservoir, making it possible for you to ride with excellence no matter what bike you have. Every turn and every corner becomes smooth and reliable with our unique and reliable STX technology.

Let your passion shine through as you get out on the road and get ready to experience a whole new way of racing.

TOP FEATURES

- > STX-technology
- > 36 mm piston diameter
- > Fully adjustable
- > Maintenance and service possibilities
- > Available in different configurations depending on the bike model

SUPERSPORT

STEERING DAMPER

An essential ingredient in a complete performance package, the Öhlins steering dampers are still the ones to beat. Thanks to the superior pressurized design and extremely tight manufacturing tolerances, the damper delivers supreme performance and agility, and with the wide adjustment range it is easy to find that perfectly weighted steering feel and feedback.

Available as a bolt-on kit for many sport and supersport models, there is also an assortment of universal models in different lengths and a wide range of mounting brackets and parts for race bikes as well as custom builders.

TOP FEATURES

- > Unique, well proven design
- > Pressurized fluid avoids problem of free play
- > Adjustable in 16 well defined clicks
- > Available in 6 different lengths/strokes
- > Kits complete with mounting brackets available for certain bikes
- > Universal parts for race bikes available

OHLINS.COM

SUPERSPORT

STEERING DAMPER EC

The Öhlins Smart EC aftermarket steering damper is designed to complement the Öhlins Smart EC system equipped on the Yamaha R1M.

The Smart EC software controlling for this steering damper is already pre-programmed into the Yamaha R1M's SCU. The steering damper is controlled by the Smart EC algorithms and reacts on speed as well as acceleration.

It constantly changes the damping settings in real time to suit the current riding conditions in the best possible way. The already excellent mechanical function in the steering damper is further improved by the Smart EC algorithms and the result is an ideal platform for any rider who wish to improve the performance on road as well as reduce the lap times on track.

TOP FEATURES

- > Öhlins Smart EC Software
- > Constantly changes damping settings in real time
- > Reacts on speed and acceleration
- > Unique, well proven design
- > Pressurized fluid avoids problem of free play
- > Improved riding experience

SUPERSPORT

FKR 100

CARTRIDGE KIT

The Öhlins FKR 100 cartridge kit has technology derived straight from the Moto3, Moto2 and World Superbike championships developed by our engineers at Öhlins HQ in Sweden. FKR 100 is for riders who demand the best performance from their bike.

Designed for top level racing in Superstock and Supersport classes. Features include a spring pressurized system, compared to the old gas pressurized system, the spring pressure offers a more simplistic and user friendly design, which also makes for easier maintenance and setting changes. Also giving a more consistent performance curve and allows for a more compact design.

FRONT FORK

Öhlins 43 mm conventional universal fork for the custom bike builder that wants supreme suspension performance. Custom 43 Blackline gives you the familiar Öhlins design in black. Inside the fork we use NIX-technology featuring compression damping in the left leg and rebound damping in the right leg, also spring preload all easily accessible at the top caps. This fork ensures great bump absorption giving the rider a smooth and comfortable ride. The forks are delivered without brake caliper and fender mountings, this enables the fork to be easily adapted to various models by the bike builder.

TOP FEATURES

- > NIX-technology
- > Stroke 130 mm, length 800 mm
- > Triple clamp diam. 43 mm
- > Wheel axle 32 mm
- > Spring rate 9,5 N/mm. Range of optional spring rates available
- > Fully adjustable

CUSTOM & HERITAGE

CUSTOM 48 BLACKLINE

FRONT FORK

NIX

A unique 48 mm front fork that originally was developed for the Ducati Diavel and has been a popular option for custom builders. Performance in spades from the latest Öhlins NIX-technology matches the aggressive and beefy looks. The front fork has compression and rebound adjustments, and is easily adjustable with rebound in one leg and compression in the other. Spring preload adjustment is done from the top cap.

This front fork does not only improve the looks but also delivers performance improving tire feel, brake support and general handling.

TOP FEATURES

- > NIX-technology
- > Compression and rebound adjustable, with rebound in one leg and compression in the other
- > Spring compression adjustments in the top cap
- > Weight and stress optimized fork bottom design

STEERING DAMPER BLACKLINE

Achieve top performance with full control as you take on your journey. The exclusive design of Blackline By Öhlins, together with the supreme performance of our Öhlins Steering Damper Blackline will make you unstoppable. Attention loves you, and with the timeless look of the steering damper you'll always be ready for it.

Enjoy endless rides thanks to the increased stability and steering feedback, reducing fatigue. Confidence and good looks go hand in hand.

TOP FEATURES

- > Unique, well proven design
- > Pressurized fluid avoids problem of free play
- > Adjustable in 16 well defined clicks
- > Improved riding experience
- > Mounted outside of the fork leg or across the frame behind
- > Fully adjustable
- > Blackline design

STREET PERFORMANCE LINE

STREET PERFORMANCE LINE

STX 46

SHOCK ABSORBER

STX

A well proven monotube design, the Öhlins STX 46 shock absorber sets the standard for performance, quality and durability. A major suspension upgrade for your sports bike suspension, it features a large 46 mm main piston and an internal gas reservoir within the main body of the shock. With adjustable damping, you can change the behavior of the shock to suit your taste and even fit a hydraulic spring preloader to change the stance of the bike. This is the perfect choice for the naked sports bike, or as we call it: the Street Performance Line.

TOP FEATURES

- > STX-technology
- > Monotube shock absorber
- > Adjustable rebound damping and compression
- > A range of spring rates available
- > Optional hydraulic spring preloader
- > Available for more than 100 different bike models

STREET PERFORMANCE LINE

NIX 22

CARTRIDGE KIT

This NIX 22 cartridge kit shares many similarities with our NIX 30 products for larger displacement supersport bikes. The NIX 22 delivers loads of performance with stable damping characteristics and great comfort contributing to rider confidence. Features include compression damping in the left leg and rebound damping in the right leg, which allows for a more precise function and stability. Adjustments are made at the top together with the spring preload, all to make it easier for you. The cartridge system is easy to install in standard front forks.

TOP FEATURES

- > NIX-technology
- > External compression and rebound adjustment
- > External 15 mm preload adjustment
- > 22 mm piston diameter
- > Range of fork springs available
- > Öhlins setting bank

STREET PERFORMANCE LINE

NIX 30 STREET

CARTRIDGE KIT

NIX

The NIX-technology is developed from world championship racing such as SBK to deliver the utmost performance. NIX 30 Street cartridge kit fits in the standard front legs giving you adjustable compression and rebound damping separated in each leg, as well as preload adjustment, all accessible from the new designed black top caps giving the bike a more subtle look. Öhlins have tested the NIX 30 cartridge kit extensively. On road as well as track, to make a kit that gives the best performance on your favourite road but also a comfortable ride when cruising or commuting to work.

TOP FEATURES

- > NIX-technology
- > External compression and rebound adjustment
- > External preload adjustment
- > 30 mm piston diameter
- > Range of springs available
- > Öhlins setting bank

STREET PERFORMANCE LINE

FSK 100

FORK SPRING KIT

This FSK 100 is an upgrade for small sports and street bikes with conventional forks. The kit is designed to improve the handling, cornering and braking and give the rider a noticeable improved feeling in all areas. The kit consists of a replacement top cap and higher performance rate springs. The replacement top cap also provides an external spring preload. It is available for street bikes such as the Yamaha MT-07, Honda CB650F and the Kawasaki Z650.

TOP FEATURES

- > Full maintenance capability
- > Replacement top caps
- > Performance rate springs

The background is a blurred photograph of a city street. In the upper half, a large, multi-story building with a green-tiled roof is visible. Below it, a scooter is in motion, its wheels and body blurred horizontally. The foreground shows a road surface and a white curb. The text 'SCOOTER PERFORMANCE LINE' is overlaid in large, white, bold, sans-serif capital letters. A solid orange horizontal bar is positioned below the text.

FDK 100

CARTRIDGE KIT

The Öhlins FDK 100 cartridge kit is a great performance upgrade for your bike. Improved handling, cornering and braking are immediately noticed. It is available for street bikes such as the Honda Monkey and Honda MSX125.

Full maintenance capability. Alternative spring rates available.

TOP FEATURES

- > Compression insert
- > Rebound insert
- > Replacement Öhlins top caps
- > Higher performance rate springs

SPRINGS

ACCESSORIES

One of the most important aspects of tuning the suspension of the bike to your weight and riding style is to choose the correct spring. Öhlins offer a wide range of springs, not only for our own shock absorbers and front forks but also replacement springs for standard applications. Depending on use, different lengths and spring rates are available.

Öhlins experienced service centers are happy to help you in making the correct decision, as well as installing the springs.

FLUIDS

ACCESSORIES

Needless to say, the fluid used in the shock is a crucial part of the performance. Leaving nothing to chance, we develop our own suspension fluids, using the more precise Centistoke scale of viscosity rather than the conventional SAE scale. But to help you out a little bit if cSt is not your thing, we did put a small number on the lower right corner of the bottle, to make a reference.

Made with the same precision as other Öhlins products, we believe that our fluids not only do the job of bringing the best out of our shocks.

ÖHLINS STICKERS

Öhlins stickers range gives you the option to personalize your bike or shock. Stickers can be found through the Öhlins network.
